It certainly may be. We will have to get into the guidance document for MMs and see what's included. We will also look at the written Track record" on this issue.

Hey guys,

One of the commenters (see attached letter) discusses " the inadequacy of Oregon Water Resources Department's (OWRD's) Water Use Basin Program as support for meeting the 6217(g) agricultural management measures and conditions placed on Oregon's Coastal Nonpoint Program." They are referring to the irrigation management measure.

Is this relevant to what we are doing?
